

A92.916: Pou 1-1 (12-960)

HATCHERY PRODUCTION
DECEMBER 1960

Chick Production

Commercial hatcheries produced 175,457,000 chicks during December, up 13 percent from December 1959. Production of broiler-type chicks totaled 155,538,000, up 10 percent from December last year. The preliminary estimate of broiler-chicks produced during 1960 totaled 1,959,897,000, compared with 1,884,120,000 in 1959 -- an increase of 4 percent. Eggs in incubators on January 1, 1961 indicate that the hatch of broiler chicks in January will be larger than in January 1960.

The number of egg-type chicks hatched during December 1960 totaled 19,919,000, up 39 percent from December 1959. The preliminary estimate of production during 1960 totaled 483,862,000, down 11 percent from 1959. The number of egg-type eggs in incubators on January 1, 1961 indicates that the hatch in January 1961 will be considerably larger than the 1960 January hatch.

Poult Production

The hatch of turkey poult during December was considerably larger than in December 1959. Production of heavy white breeds totaled 1,914,000, up 55 percent from December 1959. The hatch of other heavy breeds (mostly broad-breasted bronze) at 1,614,000 was up 88 percent. For the year 1960, the hatch of all heavy breed poult totaled 80,726,000, 10 percent more than in 1959. Heavy white production was up 16 percent. Other heavy breed production was up 7 percent.

The number of light breed poult in December 1960 totaled 746,000--up 33 percent from December 1959. The hatch for the year totaled 11,568,000, compared with 15,756,000 in 1959, down 27 percent.

Turkey eggs in incubators on January 1, 1961 indicate that the number of poult hatched in January, all breeds, will be considerably larger than in January 1960.
